

depSNORT

Dependency supply-chain scan report

dev - static, zero-execution analysis

INCOMPLETE - 1 finding(s), nothing block-class, but 15 declared dependenc(ies) never resolved; c

SCOPE

Root: pkg:pypi/pinned-scan-dir@0.0.0
Graph: 32 nodes (21 packages, 11 install hooks, 0 referenced artifacts, 0 sinks), 34 edges
Findings: 0 block, 0 gate-eligible, 1 advisory (1 total)

RESOLUTION COVERAGE

15 declared dependenc(ies) across 15 root(s) could not be resolved to a concrete version and were NOT analyzed. No check ran against them. Every verdict in this report is silent about them rather than clearing them.

pkg:pypi/blinker@1.9.0 - 1 unresolved: flit_core
pkg:pypi/click@8.4.2 - 1 unresolved: flit_core
pkg:pypi/cryptography@50.0.0 - 1 unresolved: maturin
pkg:pypi/dnspython@2.8.0 - 1 unresolved: hatchling
pkg:pypi/flask@3.1.3 - 1 unresolved: flit_core
pkg:pypi/itsdangerous@2.2.0 - 1 unresolved: flit_core
pkg:pypi/jinja2@3.1.6 - 1 unresolved: flit_core
pkg:pypi/ldapdomaindump@0.10.0 - 1 unresolved: setuptools
pkg:pypi/markupsafe@3.0.3 - 1 unresolved: setuptools
pkg:pypi/pyasn1-modules@0.4.2 - 1 unresolved: setuptools
pkg:pypi/pyasn1@0.6.4 - 1 unresolved: setuptools
pkg:pypi/pycparser@3.0 - 1 unresolved: setuptools
pkg:pypi/pycryptodomex@3.23.0 - 1 unresolved: setuptools
pkg:pypi/typing-extensions@4.16.0 - 1 unresolved: flit_core
pkg:pypi/werkzeug@3.1.8 - 1 unresolved: flit_core

Data source(s) degraded (osv): advisories or release history were unavailable for some coordinates, so vulnerability and temporal checks are a lower bound over them.

DATA SOURCE COVERAGE

osv online - queried 20, cache 0, network 0, advisories 0, gaps 20

Coverage is incomplete: 20 coordinate(s) returned no data. Findings below are a lower bound.

Error: osv: querybatch: Post "https://api.osv.dev/v1/querybatch": Forbidden

FINDINGS

By check: VC-004 x1

ADVISORY

VC-004 pypi/pyasn1@0.6.4

0.6.4 published after 492d of dormancy

severity medium - confidence 0.40 - recency 0.198 - score 0.040

Evidence: dormancy gap: 0.6.1 -> 0.6.2 (492d, 2024-09-10 -> 2026-01-16)

Remediation: verify the publishing account and confirm the release corresponds to reviewed source changes

PACKAGE RISK

1 package(s) carry a risk state and are listed below. A further 20 resolved package(s) are clean and are not listed.

RISK	PACKAGE	VERSION	DEPTH
WARNED	pyasn1	0.6.4	2

depSNORT performs static analysis only: it parses manifests and lockfiles and never runs a package manager or executes a lifecycle hook. It detects capability and indirection, not payload semantics. Advisory findings never affect the exit code; gate-eligible findings do so only when the run opts in; block findings always fail.

Report output is deterministic (no embedded timestamp).
